

A Multi-Page Event Website

Create a multi-page website for a fictional event, such as a conference or festival, using only HTML. This website will include pages for event information, schedule, speakers, registration, and more. The goal is to use a wide variety of HTML tags and features, demonstrating your ability to build a comprehensive site without CSS or JavaScript.

Requirements:

1. Home

- **Header and Navigation Bar:**
 - Create a header with the event's name, a logo, and a navigation bar that links to all other sections.
- **Main Sections:**
 - **Event Overview:**
 - Use `<section>`, `<header>`, `<h1>`, `<p>`, and `<figure>` to introduce the event with an image and caption.
 - **Call to Action:**
 - Include a prominent call-to-action using `<aside>` and a `<button>` that links to the registration page.
 - **Sponsors Section:**
 - List event sponsors using a combination of ``, ``, and logos with `` tags.

2. Schedule

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar from the home page.
- **Daily Schedule:**
 - Use a combination of `<h2>`, `<h3>`, `<p>`, and `<table>` to create a detailed schedule for the event.
 - Each day's schedule is presented in a table with columns for time, event, and location.
- **Event Descriptions:**
 - Add a brief description of each event using `<details>` and `<summary>` elements, allowing users to expand and collapse descriptions.

3. Speakers

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Speakers List:**
 - Create a section for each speaker using `<section>`, with a `<figure>` containing the speaker's photo (``) and a `<figcaption>` with their name and title.
 - Include a short bio for each speaker using `<p>` and additional information like social media links using `<a>` and ``.
- **Keynote Speakers:**

- Highlight keynote speakers using a separate <section> with a different layout, perhaps using <blockquote> for a quote or notable achievement.

4. Venue

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Venue Information:**
 - Provide detailed information about the event venue, including address, directions, and parking information.

5. Registration

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Registration Form:**
 - Create a registration form using <form>, <fieldset>, and <legend> elements.
 - Include fields for name, email, phone number, ticket type (<select>), and additional options like workshops (<input type="checkbox">).
 - Use <input type="radio"> for options such as meal preferences, and <textarea> for additional comments.
 - Add a submit button using <button>.

6. FAQ

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Frequently Asked Questions:**
 - Use a combination of <h2>, <h3>, and <p> elements to list and answer common questions.
 - Organize questions into categories using <section> and or .

7. Contact Us

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Contact Form:**
 - Create a contact form using <form>, with fields for name, email, phone number, subject, and message.
 - Use <label>, <input>, and <textarea> elements appropriately.
 - Add a <select> dropdown for inquiry type and <button> for submission.
- **Social Media Links:**
 - Provide links to social media profiles using a combination of <a>, , , and icons with .

8. About

- **Header and Navigation Bar:**
 - Replicate the header and navigation bar.
- **Event History:**
 - Use a combination of <article>, <header>, <p>, and <time> elements to describe the history of the event.
- **Event Organizers:**

- List the organizing team using <section> and , with each member's name, title, and a brief bio.
- **Event Mission Statement:**
 - Use a <blockquote> to highlight the event's mission statement.
